3. Growth - Our organization is developing dynamically

In a short time, we have grown to become a leader in the field of digital education and innovation.

Since our establishment in September 2022, we have gone through an extraordinary path of growth and development. We started as an idea for an online tutoring platform, and today we are organizers of the largest non-governmental competition focused on digital skills in Slovakia, Kockáč Roka, and organizers of workshops for students and seniors. We are constantly expanding our activities - from educational programs for young people to cyber security courses for senior citizens. Our ability to quickly adapt, innovate and expand proves that we are ready for the future and able to bring new approaches to the education system.
