

Partnership offer

KOCKAČI

Basic information

Kockáči is a civil association composed entirely of high school and university students, focused on the modernization of Slovak education and the promotion of digital literacy. Our goal is to bring education closer to current technological trends and prepare students for the rapidly changing IT world.

Activities of Kockáči

Civic association Kockáči organizes competitions, free online tutoring and educational workshops for students, teachers and seniors. We focus on digital literacy and security, as well as the integration of modern technologies into education.

Participation and outreach

In 2023, almost 1,000 students from all over Slovakia took part in the competition. We organized 160 hours of tutoring, which were used by hundreds of students. In the 2024/25 school year, we expect a several-fold increase in the reach and participation of activities.

Target group

Kockáči focuses on primary and secondary school students, actors in education and the general public. Our activities are adapted to the needs of these groups, emphasizing the availability of education and the development of practical digital skills.

Advantages of partnership with Kockáči

Get more than just publicity: Invest in the future!

Supporting innovations in education brings change.

Partners get the opportunity to support innovations in Slovak education and contribute to the development of digital literacy. In this way, they can strengthen their CSR (Corporate Social Responsibility) activities and gain positive publicity, which benefits their social responsibility.

Investing in future IT professionals pays off.

Partners can contribute to the education of talented pupils and students, thereby directly influencing the lives of young talented people. This support helps prepare the younger generation for technological challenges, which is beneficial for the future of the labor market.

Collaboration strengthens the community and increases visibility.

Cooperation with Kockáči makes it possible to build strong ties with the community and increase visibility among target groups. Marketing opportunities associated with our activities increase positive perception and recognition by the public, which benefits the reputation of partners.
